WORK EXPERIENCE & FLAGSHIP PROJECTS

SMB Group — Sr. Software Engineer

2026 – Present

Senior Software Engineer & Lead Architect

Client Site: Bihar Public Service Commission (BPSC) · Cloud & Enterprise Systems

- Architecting mission-critical public service portals, cloud infrastructure, and enterprise database migrations.
- Designing high-concurrency Spring Boot microservices handling multi-million citizen records with zero downtime.
- Implementing automated CI/CD deployment pipelines on AWS cloud with rigorous security compliance.

Grazitti Interactive — Sr. Software Engineer

Mar 2021 – 2026 (5 Years)

Senior Software Engineer · Module & Team Lead

Panchkula, India · Enterprise Cloud & Integrations Practice

Project 1: Knowbler (Chrome Extension & Community Suite)

Jul 2023 – Present

TECH: Java 17, Spring Boot, Hibernate, Spring Security, AWS, SQL, React.js · Team: 4

- Designed OAuth 2.0 authentication handshake and secure token rotation for Khoros and Salesforce communities.
- Engineered high-throughput Articles, Roles, and Boards microservice APIs using Spring Boot and Hibernate.
- Implemented dynamic configuration endpoints for Chrome Extension connection and user session mapping.
- Conducted team sprint planning, architectural code reviews, and AWS deployment automation.

Project 2: Task Tool Manager (Internal Enterprise System)

Aug 2022 – May 2023

TECH: Java, Spring Boot, Hibernate, Spring Security, AWS, Thymeleaf · Team: 4

- Created comprehensive project workflows, task assignment engine, commenting, and role-based user access panel.
- Established bidirectional synchronization between Jira REST APIs and internal database.
- Reduced manual status reporting overhead by 40% through automated event notification webhooks.

Project 3: Nintex Template Gallery

Jan 2022 – Jul 2022

TECH: Node.js, Express, MySQL, Git · Team: 3

- Configured Node.js REST API microservice for template curation and analytics with MySQL query optimization.
- Implemented administrative RESTful CRUD APIs with validation and security filtering.

Project 4: Connector (Khoros <-> Salesforce)

Apr 2021 – Nov 2021

TECH: MySQL, React.js, Spring Boot, Git · **Team:** 3

- Created bi-directional data migration service synchronizing records between Khoros and Salesforce with token refresh APIs.
- Built React.js administrative dashboard showing real-time migration throughput and status logs.
- Engineered robust error-handling retry mechanisms preventing synchronization anomalies.

iMark Infotech Pvt. Ltd. — Sr. Software Engineer

Oct 2019 – Mar 2021 (1.5 Years)

Senior Software Engineer

Chandigarh, India · Full-Stack Web & SaaS Products

Project 5: CineCave (Web Audio Mixing Suite)

Aug 2020 – Feb 2021

TECH: Vue.js, Spring Boot, Web Audio API, MySQL

- Architected dynamic frontend user interface in Vue.js with timeline controls and Spring Boot REST catalog APIs.
- Optimized audio asset caching in browser memory for seamless multi-track playback.

Project 6: Nikah Online (Digital Marriage Portal)

Feb 2020 – Jul 2020

TECH: Vue.js, PHP / Laravel, MySQL, REST API

- Designed reactive Vue.js interface with document verification, witness attestations, and event booking.
- Implemented multi-lingual localized user interfaces and secure file upload encryption.

Project 7: Gym-Team (Trainer & Client Platform)

Oct 2019 – Feb 2020

TECH: Node.js, Express, Stripe, PayPal, Socket.io

- Integrated Stripe & PayPal checkout flows and developed live chat between trainers and clients via Node.js.
- Automated subscription renewal webhooks and transaction auditing ledgers.

Protolabz eService — Software Engineer

May 2018 – Oct 2019 (1.5 Years)

Software Engineer · Healthcare Systems

Mohali, India · Enterprise Healthcare Solutions

Project 8: Aggarwal Hospital Management System

May 2018 – Oct 2019

TECH: React.js, Node.js, Express, MySQL, AWS EC2 / RDS

- Built core OPD, IPD, drug inventory, and payroll modules using React.js and Node.js on AWS EC2/RDS.
- Created automated invoice generation and doctor appointment scheduling system.

Tech Global Solution — Software Engineer

Jan 2017 – May 2018 (1.5 Years)

Software Engineer

Noida, India · Healthcare ERP & Enterprise Logic

Project 9: Metro Hospital ERP

Jan 2017 – May 2018

TECH: CodeIgniter, PHP, MySQL, Biometric API Integration

- Programmed IPD/OPD controller logic in CodeIgniter and integrated biometric fingerprint hardware for staff attendance.
- Implemented cashier handover module balancing daily cash register against hospital revenue ledger.
